COMBINED EDITION, REVISION 2. Corrections and the Ravager cleave plan are on pages R1-R10, after page 28. They override earlier pages where they conflict.

Marc & Nikki's Horde journey

Tank together.
Heal together.
Make the evening count.

Marc: Troll Warrior, Protection first, with Arms/two-handed options and a dedicated Ravager farming setup. **Nikki:** Tauren Shaman, healing and support throughout. Recruit damage players whenever a full group suits the session.

Your fixed priorities: early camping and XP benefits; accelerated Legacy talents; all available dungeon quests prepared before the first run wherever possible; gear opportunities for both characters; Ravager equipped at level 37.

Use this guide in three steps

Find your level on page 2. Read that bracket on pages 7-12, then check training, dungeon preparation and gear. For a short evening, follow the questing option; for a group evening, use the dungeon checklist.

Find it	Pages
Quick route and session rules	2-3
Camping / XP and Legacy acceleration	4-6
Detailed route, 1-60	7-12
Ravager operation	13
Training calendar and Shaman essentials	14-16
Dungeon levels and preparation	17-24
Gear opportunities, including level 60	25-27
Duo farming and session log	28
Linked research and verification notes	29-31

Evidence date matters. Forever launches November 4, 2026. This is a researched pre-launch planning edition. Several later dungeon quests, loot sources and ability ranks remain Classic-derived or provisional. Those are marked **BASELINE** or **VERIFY**; they are not claimed as launch-tested facts. [1,26]

BiS means a comparison, not an obligation. This guide recommends high-value targets. A definitive Forever best-in-slot list across all levels is not yet established. Unknown-source datamined items are excluded from your required route.

REVISION 2: add Riverglades and Shen'dralas → R5

QUICK ROUTE

Where should we play tonight?

Level	Default quest hubs	Group milestone / preparation
1-9	Durotar / Mulgore separately, then meet	Earth Totem at 4; camping and professions around 5.
10-14	Crossroads, Ratchet; class quests in Durotar	Defensive Stance + Fire Totem. RFC early attempt 10-12; smoother 13-16.
15-19	Northern Barrens, then Silverpine	Ruins of Lordaeron 16-19; WC 17-20. Start Sleeping Bag route.
20-24	Silverpine / Hillsbrad; Stonetalon / Ashenvale	SFK 20-24; BFD 22-25. Water Totem; Expert crafting; early Legacy push.
25-29	Hillsbrad, Thousand Needles; Ashenvale	Wetlands 25-29; Dalaran 28-31. Prep RFK at level 30, not just its entry level.
30-34	Thousand Needles, Hillsbrad, early STV	Both level-30 class chains; RFK 30-33; Gnomeregan 29-33. Prepare SM books.
35-39	Desolace / STV; Dustwallow / Badlands as needed	Library key before Armory. Level 37: Ravager priority. Nikki: Tempest chain.
40-44	Feralas, Tanaris, Riverglades option	Cathedral, RFD, Uldaman; Krol'dok optional. Riding and armor training at 40.
45-49	Tanaris, Feralas, Hinterlands	ZF full quest run; Maraudon 48-51. Thrash Blade and healer upgrades.
50-54	Un'Goro, Felwood; Hinterlands cleanup	Alcaz optional; Sunken Temple 52-55 after both class chains; BRD prep.
55-59	Western / Eastern Plaguelands; Winterspring	BRD targeted sections. Full groups for later dungeons; collect attunement starters.
60	Choose dungeon gearing and attunement goals	Train all key ranks; finish Legacy spend plan; compare actual Forever loot.

Levels are overlapping planning windows. Use the **lower character's level** to choose content. Leave a zone when its remaining quests become slow, scattered or trivial; completing a zone is not a requirement.

Regional travel rule: group your Eastern Kingdoms trips together: Ruins/SFK/Hillsbrad/Water Totem, then Wetlands/Dalaran/SM preparation. Avoid crossing the ocean for a single ordinary turn-in.

Sources: 1,25,26,41. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

ROUTINE AND STARTING LOGISTICS

Make a 1-3 hour session work

Available time	Choose this	Finish with
About 1 hour	One local quest circuit, class quest segment or one profession milestone. Skip a long dungeon unless already assembled at the door.	Turn in locally; sell; log out rested.
About 2 hours	One prepared short dungeon, or a regional quest loop with a class unlock.	Turn-ins and next dungeon pickup list.
About 3 hours	A longer quest dungeon, an organized Ravager block, or a bundled travel/class-chain session.	Stop before starting another long wing.

Before the first shared evening

Your races begin far apart. Recommended: finish racial starter areas through roughly 10 separately, with Nikki completing her Tauren Earth quest before leaving Mulgore. Meet at Crossroads. Moving one character earlier is possible, but the travel and different class quests make it less efficient.

Acquire flight paths in Thunder Bluff, Crossroads, Ratchet and Orgrimmar when your route passes them. Later add Camp Taurajo, Sun Rock Retreat, Splintertree/Zoram'gar, Undercity and Tarren Mill. Set your hearth to the current quest hub and update it when changing regions.

Five-minute start

☐ Compare levels, quest log and objectives. Pick one goal each; use the same active quest step where possible.

☐ Repair; clear bag space; refill drink, buff food and emergency supplies. Check both trainers if an important level was reached.

☐ Apply current food and available camp benefits. Use the Sleeping Bag during a real break once obtained.

☐ For a dungeon: inspect both logs and prerequisites; confirm the party intends to do the side objectives and escorts.

Five-minute finish

☐ Park in an inn or city. Mail excess materials and bank valuable gear.

☐ Write the next exact action in the log on page 28. Note missing quests, key holders and any gear targets worth repeating.

Time estimates throughout are budgets, not measured Forever clear times. Queue, travel, launch congestion, skill and group composition can change them. If a group is not forming promptly, keep questing while recruiting.

UNLOCK THESE BEFORE CHASING ORDINARY GEAR

Camping and every early XP advantage

Benefit	Earliest practical action	What it really does
Camp Tent	Around level 5: Nikki learns Leatherworking, reaches skill 20 and completes its Camping 101 introduction. Make tents with 5 Light Leather per craft.	Sitting nearby tops stored rested XP up to 5% of a level. It does nothing if you already have at least that much. Boosted Rest prevents another gain for an hour.
Cooked food	Learn Cooking at the first convenient trainer. Buy or cook food whose tooltip explicitly includes the XP bonus.	Suitable Well Fed food gives +5% XP from kills, plus its food stats. It is not +5% to quest rewards.
Cozy Sleeping Bag	Chain becomes available from level 14; plan the travel in the 15-24 route.	One minute per stack, up to +3% XP after three minutes; lasts two hours. Different from tent rested XP.
Inn / city logout	Every session from the start.	Build rested XP while away. With short sessions, this can make the tent temporarily unnecessary.
Legacy Well Rested	Spend early Legacy points as they arrive.	At 5/5: 20% faster accumulation and 20% higher rested cap. This is not a direct 20% XP multiplier.

Your camp setup

Nikki: **Leatherworking + Skinning** gives a tent and access to Camp Chair. Marc: **Alchemy + Herbalism** is my default for your duo, providing Mana Well and Incense Candle. Engineering/Mining is a good alternative if you value tank tools more. These choices are recommendations, not required specs. [4,5,7]

Complete **The Great Outdoors** around level 5, learn Cooking and Basic Campfire, then do the profession Camping 101 quests. Tier-one profession objects start at skill 20. Basic fire: three feature slots, but **each player can place only one feature**; all that player's features share a one-hour cooldown. You two can supply two features, not every buff at once. Anyone nearby can benefit. [4]

Priority: use the tent when rested XP is low; otherwise take useful combat/mana buffs. Do not spend ten minutes hunting a camp to gain a small bonus. Public camps and a nearby alt can help, but require a real player/character contribution and available cooldowns.

Sleeping Bag travel: burned remains south of Camp Taurajo -> remains at Alexston's Farmstead, Westfall -> abandoned camp northeast of Sun Rock Retreat -> nearby mound -> Stonewrought Dam, Loch Modan -> Thoradin's Wall jumping route. Complete in chain order; combine the Westfall leg with Deadmines travel. Student Fodder in Forever is recovery food, **not its old Season of Discovery rested-XP reward**. [6]

Sources: 4,5,6,7,40. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

Get Talented as early as practical

The goal is ten Legacy points: five in **Well Rested**, then five in **Talented**. Talented brings class talent points forward by up to five levels; the final cap remains 51. Points are Battle.net-wide across eligible non-Hardcore characters, while each character makes its own perk allocation. Nikki's separate Battle.net needs its own completed challenges. [2,7]

Correction to the voice discussion: level 25 is a convenient route milestone, not a universal Talented requirement. I did not verify a documented absolute minimum across all methods. The crafting-only plan below is an inference from published profession thresholds and challenge rewards, not an in-game tested speed record.

Character on one Battle.net	Crafting targets	Points
Main, level 20+	Two different crafting professions to 150, then both to 225.	4
Alt A, level 20+	Two other crafting professions to 150, then both to 225.	4
Alt B, level 10+	The remaining two crafting professions to 150.	2
Total	All six at 150; four of those also at 225. No dungeon milestone needed.	10

The six are **Alchemy, Blacksmithing, Enchanting, Engineering, Leatherworking and Tailoring**. A repeated milestone in the same profession on another character does not earn another first-time challenge point. Gathering and secondary skills are useful, but do not substitute for these six crafting challenges. [2,3]

Alternative	Recipe for ten points	Tradeoff
Mixed level-25 route	Six professions at 150 = 6; two at 225 = 2; first class at 25 = 1; Novice Spelunker = 1.	Less advanced crafting, but needs the whole early dungeon checklist.
Main keeps a gatherer	Put all six crafts on three alts: two level-20 crafters and one level-10 crafter.	Adds an alt; preserves your main's gathering pair. The main does not need level 20 to receive account-earned perks.

Crafting rank caps reported for Forever: **150 at character 10; 225 at 20; 300 at 35**. Train the next rank before hitting the current cap. This early plan requires no profession at 300. [3]

Practical recommendation: start with gathering pairs on your mains and staged crafting alts. Do not drop a leveled main profession merely to match a table. Keep the early talent push as a separate project with its own gold/material budget; parallel crafting reduces waiting but not material cost.

CHECK AT 10, 20, 25, 30, 45 AND 60

Legacy checkpoints and account ledger

When	Action on each account
Level 5-9	Assign the six crafts to named characters. Bank cloth, leather, herbs, ore and disenchantable surplus; never destroy useful main gear for a point.
Level 10	Raise the first available crafting pair to 150. Open Legacy when the first point appears. Put points 1-5 into Well Rested.
Level 20	Expert crafting opens. For the crafting-only push, finish four 225 milestones across two characters and six 150 milestones total.
As points 6-10 arrive	Spend one point per Talented rank. Re-open the class tree and allocate newly available class points; do not wait for the next level.
Level 24-29	Mixed route: finish Wetlands and any missing Novice dungeons; collect first class-25 point. Check the actual challenge list before planning a detour.
Level 30-45	Track Experienced Spelunker in normal dungeon order. At 45, claim the class milestone. After Talented, consider Frequent Flier and outdoor recovery.
Level 55-60	Maximum Talented stops adding an advantage once the ordinary cap catches up. Review your final Legacy allocation; respec price may change.

Novice dungeon checklist [7]

Ragefire Chasm **or** Hall of Thanes; Ruins of Lordaeron; Wailing Caverns; Deadmines; Shadowfang Keep; Excavation Site: Wetlands. Defeat the qualifying final boss and check credit. Horde does not need Hall of Thanes if RFC satisfies the alternative.

Important level mismatch: the Novice label does not prove every dungeon is a comfortable level-25 clear. Blizzard's current Wetlands band is 24-29. A level-25 group may try it, but the final fight can still be challenging. [7,25]

Craft milestone	Marc account	Nikki account
Alchemy	150 [ ] 225 [ ]	150 [ ] 225 [ ]
Blacksmithing	150 [ ] 225 [ ]	150 [ ] 225 [ ]
Enchanting	150 [ ] 225 [ ]	150 [ ] 225 [ ]
Engineering	150 [ ] 225 [ ]	150 [ ] 225 [ ]
Leatherworking	150 [ ] 225 [ ]	150 [ ] 225 [ ]
Tailoring	150 [ ] 225 [ ]	150 [ ] 225 [ ]

Talent accounting: with L = level and r = Talented ranks, available class points are **min(51, max(0, L - 9 + r))**. At 20 with 5/5, that is 16; at 25, 21; at 40, 36. These are class points, separate from Legacy spending. More points do not lower trainer/class-quest level requirements.

Sources: 2,3,7,25. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

Levels 1-14: meet, unlock, prepare

1-9 | Durotar and Mulgore

Marc: Valley of Trials -> Sen'jin / Razor Hill circuits. **Nikki:** Camp Narache -> Bloodhoof Village. Finish the local kill-and-collection bundles together within each area; prioritize compact circuits over isolated long deliveries.

At 4: Nikki completes Call of Earth with Seer Ravenfeather before leaving her starter region. Marc trains Charge/Rend. Around 5, learn professions and Cooking, unlock camps, and get Nikki to Leatherworking 20 for the tent. [4,8,11]

Gear: any affordable current-level weapon helps Marc; a usable one-hander and shield are worth keeping before the tanking unlock. Nikki wants mana stats and a functional melee weapon for low-mana periods, not a pure melee-only set.

☐ Both have bags, food/drink and hearthstones set. Save materials for the first Legacy craft milestones.

☐ Before grouping outside the racial zones: Nikki has Earth Totem; Marc has trained key early skills.

10-14 | Crossroads, Ratchet and class unlocks

Default quests: Crossroads supply/threat circuits and the Forgotten Pools storyline; Ratchet's Raptor Horns work prepares Smart Drinks for WC. Open flight paths while moving between hubs.

Marc at 10: trainer -> Veteran Uzzek at Far Watch Post -> Path of Defense in Thunder Ridge -> return for Defensive Stance, Taunt and Sunder Armor. Optional Forged Steel weapon follow-up if it improves your current weapon. [10]

Nikki at 10: Fire Totem chain via Kranal Fiss and Telf Joolam; gather its Barrens and Durotar objectives while Marc does his stance work. Do not leave the chain half-finished before the first dungeon. [11]

Dungeon choice: RFC is the first group option. After both level-10 unlocks, a coordinated 10-12 group can attempt it; treat that as a challenge, not a guaranteed efficient clear. Prefer 13-16 if recruiting strangers. At 14 Marc learns Revenge; 16 brings Shield Block. [8,12]

☐ RFC: prep Thrall's Hidden Enemies chain; collect city quests during the shared preparation trip (page 19).

☐ Start the crafting ledger at 10. Buy only useful gear; retain training gold.

Sources: 4,8,10,11,12,14. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

ROUTE DETAIL 2 OF 6

Levels 15-24: the first dungeon circuit

15-19 | Barrens -> Silverpine

Quest focus: finish the Crossroads pool/Oasis chain far enough to obtain Leaders of the Fang, then WC. Ratchet and the WC entrance cave let you gather several collection objectives before zoning in.

Dungeon nights: WC around 17-20; Ruins of Lordaeron 16-19. Use a zeppelin trip to pick up Undercity quests, then quest in Silverpine between group runs. Do not wait until 20 to discover that Ruins quests were never collected.

XP priority: start the Sleeping Bag chain once eligible at 14. For your limited time, complete its travel in linked stages across 15-24. You can rush it sooner as a dedicated travel session; that is the earliest-access choice, not necessarily the fastest immediate leveling.

Gear: Marc: Hammer of Orgrimmar, then Wingblade; Nikki: Crescent Staff or Living Root. Ruins offers new quest/drop options; compare actual caster stats before choosing. At 18, train Tremor Totem and place it before fear/sleep-heavy fights. [12-14,43]

☐ WC party agrees to the full Naralex/Mutanus finish, not just the four Fang bosses.

☐ Both loot each required quest item; do not assume kill credit supplies a quest drop.

20-24 | Silverpine/Hillsbrad and Ashenvale

Default: Sepulcher/Tarren Mill circuits while grouping for SFK 20-24. Then a Kalimdor block through Stonetalon or Ashenvale for BFD 22-25. Use the Water Totem chain to connect these trips rather than making separate continent crossings.

Nikki at 20: start Call of Water. The chain uses southern Barrens, Tarren Mill, Ashenvale and Silverpine. Finish before relying on water totems in dungeon healing. Train Ghost Wolf, Lesser Healing Wave, Call of the Elements and Totemic Recall. [11,44,45]

Marc at 20: take Speak with Ruga at Camp Taurajo; the opening trial gives Ruga's Bulwark. Gather Brutal Hauberk materials gradually; its RFK component can wait until your prepared RFK run. [10]

Legacy: the two level-20 crafting characters can now finish Expert milestones. If the gold/material supply is not ready, continue the main route and use the mixed route later.

☐ SFK: all three Horde quests active; level 18 is their common eligibility floor (page 20).

☐ BFD: Amongst the Ruins ready at 21; arrange Aquanis and Thaelrid side objectives.

Sources: 6,10,11,12,13,14,15,18,43,44,45. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

ROUTE DETAIL 3 OF 6

Levels 25-34: finish early Legacy work

25-29 | Thousand Needles, Hillsbrad, Wetlands

Quest focus: Freewind Post and compact Thousand Needles circuits; Tarren Mill/Hillsbrad while on the Eastern Kingdoms side. Ashenvale remains a fallback if local quests are still worthwhile.

Wetlands: plan a 25-29 full group; collect Changing Tastes from Borstan in Orgrimmar and complete Dragonmaw Rumors at Hammerfall to reach Open the Maw. Elder Knowledge starts from the final boss's Titan Relic; it cannot already be in your log. [17]

Deadmines: schedule 19-24 if the Westfall leg aligns, or a later quick completion for missing Legacy credit. Horde does not receive the Alliance quest package, so the trip has a different value for you. Do not force it solely for generic quest XP. [16]

Dalaran prep: work Magus Wordeen Voidglare's Tarren Mill chain starting Prison Break In and Key to the City. Heart of Disruption supplies the Horde sewer key. Plan the group at 28-31, not solely at the minimum quest level. [19]

☐ At 25: claim the class milestone on each account; check points and newly usable talents.

☐ If using the mixed Legacy route, finish every missing Novice boss before treating Talented as unlocked.

30-34 | Class chains before Razorfen Kraul

Marc at 30: The Islander -> The Affray on Fray Island for Berserker Stance. Begin Whirlwind weapon preparations only if you want a pre-Ravager two-hander; Cyclonian is a level-40 elite, so budget help or a later completion. [10]

Nikki at 30: complete Call of Air in Thousand Needles, then advance The Tempest's Weapons until its RFK objective is active. This is a major healer gear project; do not spend the dungeon boss kill before accepting the relevant step. [11]

RFK at 30-33: collect A Vengeful Fate, Going, Going, Guano!, Blueleaf Tubers, Marc's Brutal Armor objective and Nikki's note objective. Finish the scroll hand-in afterward to prepare Razorfen Downs. [20]

Before SM Library: progress Test of Faith -> Test of Endurance -> Test of Strength -> Test of Lore through its handoffs. Add Compendium of the Fallen from Thunder Bluff. Into the Scarlet Monastery becomes available at 34. [23]

☐ At 30, visit both trainers; train the new totem preset if offered and check current ability ranks.

☐ Gnomeregan: use the Horde Rig Wars/teleport preparation; plan 29-33 if the trip fits.

Sources: 7,10,11,16,17,19,20,21,23,25. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

ROUTE DETAIL 4 OF 6

Levels 35-44: Ravager and healer rewards

35-39 | Scarlet Monastery priority block

Default quests: Desolace/Stranglethorn; choose Dustwallow and Badlands segments that overlap Nikki's Tempest objectives. Get flight paths before a long detour.

At 35-36: complete the Library quest package and loot The Scarlet Key from Doan's chest. At 36, line up the Armory party and make sure axe skill is ready. **At 37, farm Herod until Ravager drops**, within the session time you choose. A ready group can also bank it slightly earlier. See page 13. [23,24,46]

Nikki's equivalent priority: finish the Tempest chain's four regional collections and elite gauntlet with appropriate help, then choose **Tidebringer's Claw** and keep **Elementalist's Guard**. Starting level is 30, but the outdoor enemies are roughly 34-41. Arrange a group if completing early. [11,39]

Other dungeons: The Drowned City is a new 35-40 group option. Do not let its new-content appeal displace your level-37 Ravager goal. New quest bundle remains a live-client check in this edition. [25]

☐ At 35: Artisan crafting can be trained if desired; 300 is not required for the early ten-point plan.

☐ Keep an updated shield/one-hander alongside Ravager. Preserve Nikki's mana and healing set.

40-44 | Tanaris, Feralas, Riverglades option

Unlocks at 40: check riding, plate for Marc, mail for Nikki and dual specialization availability/cost. Budget travel training ahead of small auction-house upgrades. Better healer cloth/leather can remain equipped; armor proficiency is not a reason to discard strong healing stats. [42]

Group circuit: Scarlet Cathedral around 39-42, RFD around 38-42, Uldaman around 42-45. Krol'dok Stronghold is officially 40-45 and is optional when the group/quest package is ready. [25]

Quest prep: in Badlands complete Badlands Reagent Run and start the Horde necklace chain before Uldaman. In Hinterlands, keep the Venom Bottles chain moving toward The Spider God. Start Yeh'kinya's Screecher Spirits in Tanaris for ZF and later Temple/LBRS. [28,29]

Gear comparison: Cathedral can offer Aegis of the Scarlet Commander for Marc and Hand of Righteousness/Whitemane's Chapeau for Nikki at 39. Compare with her Tempest rewards before repeating for them. [38]

☐ Check both 31-point capstones once your actual talent total permits them; 5/5 Talented can bring the point count five levels earlier.

☐ Use a full party for current-level dungeon progress; use Ravager on selected favorable farming packs.

Sources: 11,23,24,25,28,29,38,39,42,46. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

ROUTE DETAIL 5 OF 6

Levels 45-54: upgrades worth a detour

45-49 | Tanaris, Feralas and Hinterlands

Quest focus: Gadgetzan/Steamwheedle and Feralas hub circuits, plus Hinterlands work that advances ZF preparations. Avoid switching regions until you have several reasons to move.

ZF: aim for 44-48 with a full party and the complete package: The Spider God, Divino-matic Rod, Scarab Shells, Troll Temper, Tiara of the Deep, Gahz'rilla and The Prophecy of Mosh'aru. Verify the mallet/summon arrangement before leaving town. [29]

Maraudon: aim for 48-51 for a full quest clear. Marc's **Thrash Blade** is a reliable quest reward from Corruption of Earth and Seed, not a random weapon farm. Nikki can choose **Resurgence Rod** from her own copy if it beats her setup. Both can complete the same quest and choose different rewards. [30,37]

At 45: claim the class Legacy point. Check Experienced Spelunker, but do not run a long missing dungeon solely because the checklist is nearly complete. Compare its travel cost to the perk you would actually unlock.

☐ Maraudon party agrees to both preparatory wings and Princess, not only a Princess shortcut.

☐ Recheck gear at each route shift; weapon/shield and mana bottlenecks take priority over filling every slot.

50-54 | Un'Goro, Felwood and Temple preparation

Quest focus: Marshal's Refuge circuits in Un'Goro and Bloodvenom Post/Felwood tasks. Keep objectives geographically grouped. Alcaz Prison is officially 48-53; take a prepared group when it fits the Dustwallow trip. [25]

Before Sunken Temple: visit both class trainers at 50 and take their Temple chains. Prepare Yeh'kinya's continuation, Stonard's Pool of Tears chain, Marvon's stone-circle work and the relevant Un'Goro/Fallen Hero quests. Plan Temple at 52-55. These later chains remain **BASELINE** until checked in the live build. [31]

Marc: evaluate Diamond Flask from the level-50 Warrior chain ending in Temple; this is a Classic-derived priority, subject to Forever's actual reward choices. **Nikki:** prepare Elemental Mastery -> Spirit Totem -> Da Voodoo and prioritize the Enamored Water Spirit trinket if the live reward remains useful. This is a Classic-derived support target; check actual Forever choices. [31,65]

BRD: begin Kargath pickup rounds now, but book an explicit route such as prison/arena/key rather than a three-hour promise to clear everything. [32]

☐ At 50/52/54, check trainer ranks; Nikki's improved heals matter more than a speculative auction-house BiS purchase.

☐ After a new healing weapon, compare mana endurance as well as the size of individual heals.

Sources: 7,25,29,30,31,32,37. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

Levels 55-60: finish with a workable kit

55-59 | Plaguelands and Winterspring

Default questing: Western Plaguelands tasks from the Bulwark and Eastern Plaguelands hubs, plus Everlook/Winterspring circuits. Choose the current-level hub with several shared quests, not a chain that spends most of the evening flying.

Dungeon approach: targeted BRD at 54-60; LBRS around 57-60; Dire Maul wings and Scholomance/Stratholme with a full party near 60. Blackmaw Hold is officially 55-60; Shaper's Terrace 58-60. Their presence does not establish duo feasibility or a complete published quest bundle. [25,32-36]

Attunements: collect the Molten Core starter before the BRD route that reaches its objective. Start Warlord's Command at Kargath before the relevant LBRS boss clear, then keep Horde Onyxia steps in order. Do these if they match your endgame plans; raid preparation need not interrupt every leveling session. [33,47]

Nikki's progression: prioritize practical healing upgrades in the same runs as Marc's tank upgrades. Do not spend evenings forcing an extremely rare healer item while several normal slots are still weak.

☐ Confirm keys and specific sections before recruiting. Bring enough drink for caster-heavy fights and wipes.

☐ If your duo test is slower than ordinary questing, finish the selected objective and move on; it can still be a fun farm.

60 | Training and a clear next goal

First stop: train missing core ranks, spend remaining class points, review your Legacy build and repair/refill. Compare live Forever item tooltips with the provisional targets on page 27.

First gearing nights: choose one useful dungeon for both of you. Example: a BRD route can address tank pieces and a healer trinket opportunity. A Stratholme run may address a one-hander and healer chest/neck options. Sources for those examples are Classic baseline, not guaranteed Forever rankings. [48,49]

Keep both Warrior loadouts: one-handed weapon + shield for current-level tanking, and Ravager as the special-purpose AoE set you requested. A new single-target weapon does not make the AoE toy redundant.

Next project: pick one of dungeon completion, a raid attunement, reliable duo farming, professions or relaxed quest cleanup. You do not need to pursue all five at once.

☐ Write the next dungeon, both gear priorities and any chain prerequisite in the session log.

☐ Finish with a build that fits how you actually play together; avoid changing specs solely to copy an untested ranking.

Sources: 25,32,33,34,35,36,47,48,49. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

Operation Ravager: ready at 37

Confirmed target: Ravager, two-handed axe, **requires level 37**, drops from **Herod in Scarlet Monastery Armory**. Loot before 37 can be banked; equipping still waits for 37. [24]

When	Action
Before 34	Unlock axe use and keep two-handed axe skill current. Keep Arms-oriented/farming gear if useful; no respec is required just to equip Ravager.
34-36	Prepare all SM quests (page 22). Run Library and take The Scarlet Key from the chest after Doan. This provides door access for Armory/Cathedral. [23,46]
36, if a strong party is available	A pre-farm is optional. Herod is around level 40, so a low party should be deliberately assembled for it. Bank an early drop.
37: priority evening	Recruit three damage players, clearly advertise Herod runs and your Ravager goal, and agree loot expectations before the first pull. Run Armory repeatedly within your time budget.
After the drop	Equip, test the proc on a modest outdoor pack, and store your sword-and-board swap where you can reach it instantly.

What to tell the group

“Tank + healer LF 3 DPS, SM Armory / Herod runs. Farming Ravager for the Warrior; please agree loot before joining. Doing any needed quest objectives on the first pass.”

How to use it with your actual build

You want the proc for mass-melee farming while remaining Protection. Keep that plan. However, removing the shield also removes access to blocks and shield-dependent Protection effects. Nikki's healing load can rise sharply; a shield-based Revenge setup remains a useful comparison even on AoE pulls.

Select compact melee packs with no serious interrupt, silence, mana-burn or forced-movement problem. Bring mobs into a stable pile and keep the healer out of their path. Learn which action cancels the proc channel before a large pull. A proc can fail to arrive when you want it; your opening must be survivable without it.

Your previous whole-dungeon pulls are a valid personal experience. This guide does not treat them as a tested Forever route: different tuning, mobs and control effects can change the result. Measure a smaller version first, then scale to the pull size you and Nikki can sustain.

Drop odds: no Forever drop rate is assumed here. If a hypothetical per-run drop chance were 15%, five attempts give only 1 - 0.85^5 = **55.6%** chance of at least one drop. Five runs is a budget, not a promise. Stop when the evening stops being enjoyable and resume next session.

Sources: 24,46. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

TRAINER LEVELS STAY FIXED EVEN WHEN TALENTED ADDS POINTS

Marc's training calendar

Level	Do this before the next serious fight
4 / 6 / 8	4: Charge, Rend. 6: Thunder Clap. 8: Hamstring for runners.
10	Complete stance quest. Confirm Defensive Stance, Taunt, Sunder Armor and Bloodrage.
12	Shield Bash; update Battle Shout. Put interrupt on a reachable key.
14	Revenge, Demoralizing Shout and Tactical Mastery availability. This is a major tanking visit.
16	Shield Block. Test it with Shield Specialization and Revenge.
18	Disarm; Thunder Clap rank. Check shield and weapon skill.
20	Cleave; start the Ruga class chain. Review newly available Protection talents.
22 / 24	22: Intimidating Shout; Battle Shout/Sunder ranks. 24: Execute, Revenge and Demoralizing Shout ranks.
26 / 28	26: inspect trainer for any used ranks. 28: Shield Wall; Thunder Clap rank.
30	Berserker Stance via The Affray; inspect Berserker Rage / Intercept training. Cleave rank.
32 / 34	32: Battle Shout. 34: Revenge, Demoralizing Shout, Sunder ranks.
36 / 38	36: inspect used ranks and two-handed options. 38: Thunder Clap rank. Ravager equip milestone is 37, not a trainer unlock.
40	Plate, riding and dual-spec check. Shield Slam is a talent milestone, normally 40 without Talented in a deep-Protection build.
42 / 44 / 46	42: Battle Shout. 44: Revenge/Demoralizing Shout. 46: Sunder Armor.
48 / 50 / 52	48: Shield Slam and Thunder Clap ranks, if applicable. 50: Cleave + level-50 class chain. 52: Battle Shout.
54 / 56 / 58 / 60	54: Revenge/Demoralizing Shout/Shield Slam. 56: inspect trainer. 58: Sunder/Thunder Clap. 60: Cleave/Shield Slam and any missing core ranks.

Talent direction: favor the Protection engine first: Shield Specialization, Improved Revenge, rage/cost support, defensive utility and deeper shield talents. Add Arms utility or a second spec when it serves your two-handed plan. Talented changes when enough points exist; always satisfy the live tree's row and prerequisite rules. [8,42]

Every even level: check the trainer's available list when in town. The rows above prioritize high-impact visits, not every optional ability rank. At 26/36/56, “inspect” deliberately avoids inventing a new unlock.

Sources: 8,10,42,50. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

HEALING AND SUPPORT ARE THE MAIN JOB FROM THE START

Nikki's training calendar

Level	Priority unlock / action
4 / 6 / 8	4: Tauren Earth Totem quest. 6: Healing Wave rank; Earthbind check. 8: Purge and current damage spell ranks.
10	Complete Fire Totem chain. Keep its new relic reward. Train relevant support/weapon spells.
12	Ancestral Spirit resurrection, Fire Nova and Healing Wave rank. Practice healing without retargeting.
14 / 16	14: check Cure Poison and damage ranks. 16: inspect used spell ranks; keep a low Earth Shock rank for inexpensive interrupts.
18	Tremor Totem; Healing Wave rank. Set an earth-totem replacement bind.
20	Water Totem chain; Ghost Wolf; Lesser Healing Wave; Call of the Elements and Totemic Recall. Water Shield is a Restoration talent, not a guaranteed trainer spell.
22 / 24	22: Totemic Projection; disease removal / cleansing check. 24: Healing Wave rank; review low-mana emergency plan.
26 / 28	26: Mana Spring Totem. 28: Lesser Healing Wave rank; inspect resistance/utility totems.
30	Air Totem quest, Call of the Spirits second preset and Reincarnation. Carry an Ankh if required. Start the Tempest weapon chain before RFK.
32 / 34	32: Windfury Totem, Healing Wave and Chain Lightning. 34: inspect utility ranks and the live totem list.
36 / 38	36: Lesser Healing Wave / Mana Spring ranks. 38: inspect current damage and support ranks.
40	Mail training check; Chain Heal; Healing Wave; Call of the Ancestors third preset. Riptide is a Restoration talent milestone, normally 40 without Talented.
42 / 44 / 46	42: inspect utility. 44: Lesser Healing Wave. 46: Chain Heal / Mana Spring rank check.
48 / 50 / 52	48: Healing Wave. 50: inspect class quest offers before Temple. 52: Lesser Healing Wave.
54 / 56 / 58 / 60	54: Chain Heal. 56: Healing Wave / Mana Spring. 58: inspect useful ranks. 60: final healing and support ranks; review consumables/reagents.

Talent milestones to seek, not automatic spells: Mindfulness for mana recovery, Water Shield, Mana Tide Totem, Nature's Swiftness and Riptide. In a deep Restoration route their ordinary milestones include 20 for Water Shield, 25 for Mana Tide, 30 for Nature's Swiftness and 40 for Riptide; Talented can move point availability earlier, but totem quests and trainer spells retain their own requirements. [9]

Use the current trainer as final authority. Later ranks in this table include beta/client and Classic-derived schedules. An unexpected live level should be recorded, not worked around by buying a similarly named spell from another WoW version.

Sources: 9,11,43,44,45,51. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

NIKKI'S OWN PRIORITY LIST

The Shaman essentials you should not miss

Priority	Why it belongs in your route
Earth / Fire / Water / Air	Class quests at 4 / 10 / 20 / 30. Complete every elemental unlock; do not mistake a learned totem spell for possession of its required class tool.
Totem presets + Recall	Call of the Elements at 20, Spirits at 30, Ancestors at 40. Use a basic questing set and a dungeon set. Recall old totems when leaving them behind; train Totemic Projection at 22 to relocate them. [64]
Mana recovery talents	Mindfulness and Water Shield support sustained duo healing; Mana Tide is an important cooldown. Check that Water Shield is active after changes or deaths.
Tremor / cleansing / Purge	Fear/sleep/charm control, poison/disease removal and enemy-buff removal solve problems that extra raw healing cannot.
Windfury Totem at 32	A major melee support milestone for your Warrior partnership. It is separate from Windfury Weapon, the Shaman's personal weapon imbue.
Tempest weapon package	Level-30 chain unlock; strong support weapon and shield opportunity. Prepare RFK step first; finish the elite finale with help if needed.
Relic slot	Keep Totem of Charged Flames from Fire. At 20+, inspect Polished Driftwood Icon from Enchanting; current guide lists 8% mana regeneration while casting. Confirm binding and profession requirement before buying/crafting.
Reagents and healing supplies	Carry appropriate water/drink and mana potions, plus Ankhs after Reincarnation if required. Buy reagents for current Water Walking/Breathing tooltips if you intend to use them.

Healing controls before the first dungeon

Show both players' health, mana, removable debuffs and enemy casts clearly. A friendly mouseover heal is useful: **/cast [@mouseover,help,nodead][help,nodead][@player] Healing Wave**. Test it in the open world. An out-of-range valid mouseover does not automatically fall back to the tank. [52]

Use Healing Wave as the steady heal; keep Lesser Healing Wave available for urgency. Later use Riptide and Chain Heal where they fit the actual damage pattern. Nikki can contribute damage, but preserve enough mana and cast time to survive the next pull.

Totem slot discipline: one active totem per element. Tremor replaces Strength of Earth; Mana Tide occupies the water slot; Grounding competes with Windfury in air. Replace the regular buff afterward. Do not treat every enemy spell as interruptible or groundable.

Your two-word callouts: “mana stop”, “big pull”, “interrupt mine”, “shield swapping”. Decide who calls a reset. Preventing one uncontrolled pull saves more time than a small paper DPS improvement.

Sources: 9,11,39,43,45,51,52,53. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

EARLIEST ATTEMPT IS NOT THE ALL-QUESTS-READY LEVEL

Dungeon timing: early and midgame

Columns: Early = my proposed coordinated five-player attempt. Ready = minimum for the listed Horde quest bundle, after prerequisites; not an entry requirement. Duo = an **untested planning window** for your tank/healer pair, not a promise of efficient XP. A dash means no dependable recommendation.

Dungeon	Early group	Quest-ready floor	Duo trial
Ragefire Chasm	10-12	9 [12]	18-22
Hall of Thanes	Horde: skip	RFC substitutes for Novice	-
Ruins of Lordaeron	15-16	16 [13]	23-27
Wailing Caverns	15-17	15 for full listed package; chain required [14,26]	25-29
Deadmines	17-19	No normal Horde package [16]	25-30
Shadowfang Keep	18-20	18 for your three Horde quests [15]	28-32
Blackfathom Deeps	20-22	21 for Amongst/Aquanis [18]	29-34
Excavation Site: Wetlands	24-25	24 [17]	33-37
City of Dalaran	28	24 listed; access chain required [19]	37-41
Gnomeregan	27-29	25 Rig Wars; neutral tasks may add gates [21]	37-42
Razorfen Kraul	27-29	30; Nikki's class chain also starts 30 [20]	36-40
SM Graveyard	28-30	30 for Hearts of Zeal [22]	36-40
SM Library	31-33	34 incl. Into SM [23]	39-43
SM Armory	35-37	34 shared SM kill quest [23]	43-47
The Drowned City	35-37	VERIFY new bundle	No tested window
SM Cathedral	37-39	34 shared SM kill quest [23]	47-51
Razorfen Downs	37-39	37 main Horde bundle, BASELINE [27]	47-51
Uldaman	40-42	40 Platinum Discs; multi-visit necklace [28]	49-54
Krol'dok Stronghold	40-42	VERIFY new bundle	No tested window

For your first full-quest visit: take the later of the Early window and Quest-ready floor, then finish every prerequisite. Example: RFK is attempted earlier by some groups, but **level 30** is the relevant floor for your combined quest/class package.

Sources: 12-23,25-28. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

Dungeon timing: 40-60 and return trips

Dungeon / section	Group plan	Quest coverage / duo plan
Zul'Farrak	Early 42-44; preferred 44-48	Quest floor 40, BASELINE. Duo trial 52-56; stairs/event may be the bottleneck.
Maraudon	Early wings 43-46; full 48-51	Full reward package floor 45, BASELINE. Duo full trial 55-60; selected wings sooner.
Alcaz Prison	Official band 48-53	VERIFY quests. No supported efficient duo window.
Sunken Temple	Early 50-52; preferred 52-55	Both level-50 class packages prepared. Duo selected content at 60; full clear unverified.
BRD: prison / arena / key	52-56 targeted	Multiple chains; no single all-quests first run. Duo selected early sections 58-60 as a farm test.
BRD: deeper / Emperor	57-60 full group	Do the relevant handoffs before returning. No efficient complete duo recommendation.
Dire Maul East	56-60 full group	BASELINE key/quest prep; duo selected farm routes at 60 only after testing.
LBRS	57-60 full group	BASELINE Warlord's Command and related quests. Full duo not an efficiency recommendation.
Dire Maul North / West	58-60 full group	Separate routes; key and North/West handoffs can require returns. No routine duo recommendation.
Scholomance	58-60 full group	Key and long quest chains. Plan a return. Full duo unverified.
Stratholme live / undead	58-60 full group	Choose side and quest objectives first. Late follow-ups can force repeat visits.
UBRS	60 with appropriate group size	BASELINE Seal of Ascension / attunement checks. Not a two-player leveling target.
Blackmaw Hold	Official band 55-60	VERIFY new bundle and route length. Group first.
Shaper's Terrace	Official band 58-60	VERIFY new bundle. Group first.

What “efficient duo” must pass

Test three ordinary pulls and one meaningful boss before committing the session. Record elapsed time including drinking, recovery and travel. The farm is worthwhile if its quest reward, gear goal or fun justifies that time compared with nearby questing. Older dungeon mobs may give little or no XP at your duo level; survival alone does not make the run efficient.

Your ready-to-run rule: both logs correct; prerequisite chain finished; key/summon item arranged; side route and escorts agreed; enough time for the objective. No early/duo range bypasses a hard live entry or quest requirement.

Sources: 25,27-36,47. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

Dungeon prep: RFC and Ruins

Ragefire Chasm | first group target 10-16 [12]

Before entry	Pickup / chain
Testing an Enemy's Strength	Rahauro, Thunder Bluff (about 70.6,31.6).
Searching for the Lost Satchel	Rahauro; inspect Maur Grimtotem's corpse/satchel inside and take the return step.
The Power to Destroy...	Varimathras, Undercity. Collect both books from Searing Blade enemies.
Hidden Enemies	Thrall, Orgrimmar. Finish outdoor insignia and dialogue handoffs until the active step names Bazzalan and Jergosh.
Slaying the Beast	Neeru Fireblade, Orgrimmar. Loot Taragaman's heart.

All five listed prerequisites/quests have minimum 9 in the cited Forever guide. **Source disagreement:** the later general quest guide places the satchel starter inside RFC, while the dedicated guide gives Rahauro. Check Rahauro first because you are collecting his other quest, then inspect the corpse in the run. Do not make a second city trip just to reconcile the two listings. [12,26]

Preparation loop: Nikki's Thunder Bluff visit covers Rahauro; collect Orgrimmar quests while Marc finishes class training. Bundle Undercity with a scheduled trip or a valid party share if available. The ideal all-quest run requires that extra pickup; an early local run can still be chosen if you explicitly accept leaving it for later.

Ruins of Lordaeron | ready from 16 [13]

Quest	Pickup / same-run task
A Frightened Request	Tabitha Heartweaver, Silverpine (44.5,43.0); find husband's corpse.
Light's Justice	Morbin Lightbane, Undercity (57.8,89.8); collect limbs.
The New Plague	Theodore Griffs, Undercity (46.6,72.0); loot Witherfang.
The Wrath of Rath'mael	Deathguard Kristof, Tirisfal (65.2,60.2); kill Rath'mael.
Crest of Lordaeron	Collect crest inside; deliver Horde version to Oran Snakewrithe, Undercity.
Unending Torment	Loot The Baron's Abominable Head; accept its follow-up chain.

Both players: loot required objects and boss drops personally. In-dungeon starters cannot be preloaded; include them in the first clear and finish their external hand-ins afterward. This is compatible with your goal of avoiding a second combat run.

Sources: 12,13,26. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

Dungeon prep: WC, SFK and Deadmines

Wailing Caverns | prepare the chain before 17-20 [14]

Quest	Preparation
Leaders of the Fang	Start Tonga Runetotem's Forgotten Pools chain at Crossroads; complete pool/oasis handoffs through the Thunder Bluff referral and Nara Wildmane. Accept the four Fang-leader objective before entering.
Smart Drinks	Ratchet: Mebok Mizzyrix. Complete Raptor Horns first.
Trouble at the Docks	Ratchet: Crane Operator Bigglefuzz. Kill Mad Magglish in the exterior cave.
Deviate Hides / Deviate Eradication	Nalpak / Ebru in the cave above the entrance skull; climb behind the entrance and drop into the upper cave.
Serpentbloom	Apothecary Zamah, Thunder Bluff. Collect plants in exterior and interior.
The Glowing Shard	Loot Mutanus after the Naralex event; follow the outside handoffs afterward.

One-run risk: hides, plants and essences are limited/shared drops. Pre-farm exterior objectives for both players before the instance if necessary. Insist on the Naralex escort/event after the four Fang bosses; otherwise you miss Mutanus and the shard. [14]

Shadowfang Keep | all three Horde quests from 18 [15]

Quest	Pickup
Deathstalkers in Shadowfang	High Executor Hadrec, Sepulcher. Find Adamant and Vincent.
Arugal Must Die	Dalar Dawnweaver, Sepulcher. Loot Arugal's head.
The Book of Ur	Keeper Bel'dugur, Undercity. Book is in Fenrus's room; let each player loot it.

No Rogue, Warlock or Paladin class quests belong in your two-character checklist. Check healer line-of-sight and crowd control before the late caster fights. Allow 90-150 minutes including travel/turn-ins on your first group night; this is a planning allowance.

Deadmines | Horde completion trip [16]

The dedicated guide's normal quest package is Alliance-only. You can still run it for loot and Novice credit. Bundle the visit with Westfall's Sleeping Bag step. Explain to the group that your objective includes the qualifying final encounter; take both VanCleef and Cookie where the run continues. Do not travel to Stormwind to collect unavailable Alliance quests.

Sources: 14,15,16,26. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

Dungeon prep: BFD, Wetlands and Dalaran

Blackfathom Deeps | full listed Horde package from 21 [18]

At Zoram'gar, Je'neu Sancrea supplies **The Essence of Aku'Mai**, **Allegiance to the Old Gods** and **Amongst the Ruins**. Bring any prerequisite damp-note handoff to Je'neu if offered. Inside, visit Argent Guard Thaelrid in the underwater side cave for **Blackfathom Villainy**. Loot the Fathom Core for Amongst the Ruins to trigger **Baron Aquanis**, then take the Strange Water Globe quest. Do not skip that water-side objective. Paladin/Warlock class tasks are not yours.

Loot worth noticing: Outlaw Sabre from the Aquanis follow-up for Marc; healing/caster quest rewards for Nikki. Both loot personal quest items. Final chamber completion and Kelris quest credit are different objectives, so agree to do both.

Excavation Site: Wetlands | Horde quests from 24 [17]

Quest	Where / prerequisite
Changing Tastes	Borstan, Orgrimmar (57.4,53.4). Collect meats from the dungeon beasts.
Open the Maw	Advance Dragonmaw Rumors from Zaruk, Hammerfall, Arathi (74.4,35.6) until the dungeon objective is active.
Elder Knowledge	Loot Titan Relic from Relic Guardian; hand in to Bashana Runetotem in Thunder Bluff.

Elder Knowledge starts inside, so it cannot be accepted before the clear. The all-quest condition here means both outdoor pickups ready and both players remembering the final-boss drop. Official dungeon band: 24-29; duo trial 33-37 remains an estimate.

City of Dalaran | planned group 28-31 [19]

Quest	Where / prerequisite
Heart of Disruption	Magus Wordeen Voidglare's Tarren Mill chain: Prison Break In / Key to the City and subsequent handoffs -> Image of Archmage Modera, Silverpine. Grants Dalaran Sewer Key.
The Grave Knight	Melisara, Hillsbrad (62.6,20.6); kill Atrexis.
Source of Power	Doctor Martin Felben, Undercity; gather Cracked Sentry Cores.
Opportunistic Education	Rexxie Copperclutch inside; collect Founding of Dalaran book.

The Dalaran guide's introduction and displayed table disagree about the number of quests. These are the **four Horde tasks explicitly detailed** in that source, not a claim that the launch bundle is exhaustive. Cracked cores can also require extra kills/runs. Check the live journal before calling it fully prepared.

Sources: 17,18,19,25. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

PREVENT THE MOST AVOIDABLE REPEAT VISITS

Dungeon prep: RFK, Gnomeregan and SM

Razorfen Kraul | your combined package wants level 30 [20]

Before entry: A Vengeful Fate - Auld Stonespire, Thunder Bluff (29 minimum); Going, Going, Guano! - Faranell, Undercity (30); Blueleaf Tubers - Mebok Mizzyrix, Ratchet (bring his gopher equipment). Marc carries the Brutal Hauberk objective for Roogug's Vial of Phlogiston. Nikki advances Tempest's Weapons until Charlga's Tattered Note objective is active. [10,11,20]

During/after: do Willix's escort; loot Charlga's Small Scroll for An Unholy Alliance. Turn the scroll in to Varimathras before RFD. Finish Guano before collecting Hearts of Zeal for Scarlet Monastery. Shared collection drops may prevent a single-run finish.

Gnomeregan | plan 29-33 [21]

Collect **Rig Wars** from Nogg in Orgrimmar (25). Follow the Horde **Chief Engineer Scooty** / **Gnomer-goooooone!** travel setup through Booty Bay and retain the transponder if supplied. Inside, confirm any eligible neutral **A Fine Mess**, **The Sparklematic 5200!** and grime-encrusted item tasks. Loot Thermaplugg's combination and the safe's Rig Blueprints. The side-objective list and exact later gates need a live check; this is not an exhaustive confirmed Forever bundle.

Scarlet Monastery | prepare together before the first serious block [22,23]

Task	Pickup / condition
Hearts of Zeal	Faranell, Undercity; finish RFK Going, Going, Guano! first. Minimum 30; hearts can come from all wings.
Vorrel's Revenge	Vorrel inside Graveyard, after Vishas. Minimum 25; finish Nancy Vishas outside in Alterac.
Compendium of the Fallen	Sage Truthseeker, Thunder Bluff. Minimum 28; available to your Troll/Tauren characters.
Test of Lore	Start Test of Faith in Thousand Needles, complete Endurance/Strength and Lore handoffs until Parqual Fintallas sends you for the Library book. Listed Lore minimum 26.
Into the Scarlet Monastery	Varimathras, Undercity. Minimum 34. Kill Loksey (Library), Herod (Armory), Mograine and Whitemane (Cathedral).
Scarlet Key	Library: loot chest after Doan before attempting locked wings. [46]

Best fit for you: Graveyard once when prepared, Library at 34-36 with both books, Armory farming at 37, Cathedral around 39-42. One shared kill quest spans multiple wings; a first Armory clear alone cannot complete it.

Sources: 10,11,20,21,22,23,46. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

Dungeon prep: 35-50 planning bundles

The Drowned City and Krol'dok Stronghold [25]

Official bands: 35-40 off Stranglethorn and 40-45 in Riverglades. Include them as group alternatives. **VERIFY:** current Horde quest names, quest minima, prerequisite chains and loot before the trip. Published bands are not enough to certify an all-quest-ready level; no reliable duo level is asserted here.

Razorfen Downs | main Horde package from 37 [27]

Before: **Bring the End** from Andrew Brownell, Undercity; **An Unholy Alliance** follow-up after the RFK scroll hand-in. Outside: **A Host of Evil** from Myriam Moonsinger. Inside: **Scourge of the Downs -> Extinguishing the Idol** from Belnistrasz. Ensure both players complete the starter before anyone triggers his escort. Budget time for its waves. Some public guides misidentify the scroll source; RFK Charlga is the preparation used here.

Uldaman | full package from 40, with returns [28]

Badlands Reagent Run -> Uldaman Reagent Run: Jarkal Mossmeld, Kargath. **Reclaimed Treasures**: Patrick Garrett, Undercity. **Necklace Recovery**: Dran Droffers, Orgrimmar; prepare its outdoor drop and city handoff stages before the full instance. **Solution to Doom**: Theldurin, Badlands; exterior objective. **Power Stones**: Rigglefuzz, Badlands. **The Platinum Discs**: after Archaedas, minimum 40. Necklace handoffs can require extra visits. Assemble the Staff of Prehistoria for Ironaya if that remains the live mechanism.

Zul'Farrak | quest floor 40, preferred group 44-48 [29]

Gadgetzan: **Divino-matic Rod** (Bilgewhizzle), **Scarab Shells** (Tran'rek), **Troll Temper** (Trenton). Dustwallow: **Tiara of the Deep** (Tabetha). Shimmering Flats: **Gahz'rilla** (Wizzle). Steamwheedle: **Screecher Spirits -> The Prophecy of Mosh'aru** (Yeh'kinya). Horde chain: **Venom Bottles -> Undamaged Venom Sac -> Consult Master Gadrin -> The Spider God**. Arrange the mallet/summon requirement. Include the pyramid event and tablets, not only the end boss.

Maraudon | full package floor 45, preferred 48-51 [30]

Orgrimmar: **Shadowshard Fragments** (Uthel'nay). Desolace: **Vyletongue Corruption** (Vark Battlescar), **Corruption of Earth and Seed** (Selendra), **Twisted Evils** (Willow), **The Pariah's Instructions** (centaur pariah). Cavindra outside: **Legends of Maraudon**. Inside: **The Scepter of Celebras** after his encounter. Have all relevant wing objectives before taking a Princess shortcut. Thrash Blade/Resurgence Rod are separate personal reward choices. [37]

Sources: 25,27,28,29,30,37. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

MULTI-VISIT CHAINS CANNOT ALL BE PRELOADED

Dungeon prep: 50-60 planning bundles

Sunken Temple | prepare both class chains at 50 [31]

Stonard: Fel'zerul's **Pool of Tears** chain to **The Temple of Atal'Hakkar**. Feralas/Tanaris: **The Sunken Temple -> The Stone Circle -> Into the Depths / Secret of the Circle** as offered. Steamwheedle: Yeh'kinya's post-ZF chain to **The God Hakkar**. Check **Zapper Fuel** via Un'Goro/Liv Rizzlefix and **Jammal'an the Prophet** via the Hinterlands exile. Marc: A Troubled Spirit -> Warrior Kinship -> War on the Shadowsworn -> Voodoo Feathers (Diamond Flask). Nikki: Elemental Mastery -> Spirit Totem -> Da Voodoo (Enamored Water Spirit, BASELINE). Collect the Eranikus starter inside. [65,66] Later Forever availability/reward changes remain unverified.

Blackrock Depths | book a section, not “all BRD” [32]

Kargath supplies several Horde starters, including **KILL ON SIGHT: Dark Iron Dwarves**, **Disharmony of Flame** leading toward **Disharmony of Fire**, **The Rise of the Machines**, **Lost Thunderbrew Recipe** and Vivian Lagrave's prison work. Check **The Love Potion** and **The Heart of the Mountain** where offered. Take **Dark Iron Legacy** from Franclorn in ghost form for the key route and **Attunement to the Core** from Lothos before the lava/core section. Prison interrogation, Bael'Gar, key and Emperor objectives are not interchangeable routes; multiple runs are expected. [47]

LBRS / UBRS [33]

Before LBRS: **Warlord's Command** from Warlord Goretooth, Kargath, **Bijou's Belongings** / related inside chain, **Urok Doomhowl** and **The Pack Mistress** as offered. Prepare the Mosh'aru continuation before the tablet bosses. UBRS follows its own access and Horde Onyxia steps; arrange a key holder and appropriate group size. Do not claim that one first visit finishes both spires and all attunements.

Dire Maul, Scholomance and Stratholme [34-36]

Dire Maul: inspect Camp Mojache's **Lethtendris's Web** and **Pusillin and the Elder Azj'Tordin**; East can provide the Crescent Key. North tribute and a full boss kill route differ, while **Unfinished Gordok Business** links North and West. **Scholomance:** start its key chain at the Bulwark; Caer Darrow/Barov and later follow-ups can require repeat visits. **Stratholme:** gather Eastern Plaguelands/Light's Hope/Argent Hold tasks; choose live or undead objectives and complete Tirion-related prerequisites before expecting their finale. Check the live journal for the full package.

Explicit coverage limit: this page is a preparation framework and known-chain shortlist, not a verified exhaustive quest ledger for every late dungeon. Alcaz, Blackmaw and Shaper's Terrace quest bundles also remain VERIFY. The first-run all-quest goal cannot honestly be guaranteed from current pre-launch evidence.

Sources: 25,31,32,33,34,35,36,47. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

Gear opportunities: levels 1-34

“Target” means worth comparing or detouring for, not proven universal Forever BiS. Quest choices are guaranteed only after completing the quest; boss drops are never guaranteed. Budget one prepared dungeon clear, then repeat only for a specific worthwhile upgrade.

Level band	Marc: tank / two-handed	Nikki: healer / support
1-9	Affordable current-DPS weapon; retain any useful one-hander + shield. Avoid spending heavily on armor replaced immediately.	Mana-stat quest gear and a usable weapon. Train key heals before buying gear.
10-14	Hammer of Orgrimmar from Hidden Enemies/RFC follow-up; crafted Thick War Axe at 12 if affordable. [12,54]	Fire quest relic: Totem of Charged Flames. RFC caster drops such as Robe of Evocation are comparisons, not mandatory farms. [11,55]
15-19	Wingblade from Leaders of the Fang, WC. Cruel Barb from VanCleef if Deadmines already fits the Legacy trip. [14,54]	Crescent Staff from her own Leaders quest; Living Root from Verdan as an alternative. Glowing Shard follow-up offers Talbar Mantle. [14,55]
20-24	Ruga's Bulwark from class quest; compare with SFK shields/drops. Outlaw Sabre from BFD Aquanis follow-up when ready. [10,18]	Polished Driftwood Icon at 20+ (Enchanting; verify binding/requirement). SFK's caster cloth and Crescent/Living Root remain candidates. [53]
25-29	Outlaw Sabre if still missing. Rig Wars reward choices from Gnomeregan; compare tank stats rather than selecting a DPS item automatically. [18,21]	Healer's Staff from Wetlands Elder Knowledge if better; caster Rig Wars reward, Civinad Robes, if useful. [17,21]
30-34	Brutal Hauberk after RFK class-chain completion; Whirlwind two-hander optional with help. No obligation to farm a temporary weapon before Ravager. [10]	Prepare Tidebringer's Claw + Elementalist's Guard through Tempest's Weapons. Compare spell/healing leatherworking crafts and relic upgrades. [11,39]

Gear decisions that save time

Marc: compare one-handed weapon DPS, shield armor/block and enough stamina for the pulls you are doing. Keep weapons skilled. A higher item level without usable stats is not automatically an upgrade.

Nikki: compare healing/spell power, intellect, mana sustain and enough stamina. Cloth and leather can be legitimate healing upgrades. Spell-damage-only gear does not automatically improve healing; read the exact tooltip.

Shared reward planning: each of you chooses a reward from your own quest. Marc can take Wingblade while Nikki takes Crescent Staff. Avoid competing for an item when equivalent personal quest rewards solve the same problem.

Sources: 10-18,21,39,53,54,55. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

Gear opportunities: levels 35-59

Band	Marc	Nikki
35-39	PRIORITY: Ravager at 37, Herod. Sword of Omen from Into SM after all required wing kills. Herod's armor is worth comparing during the farm. [23,24]	PRIORITY: finish Tempest weapon/shield if feasible. Library caster options such as Illusionary Rod are alternatives, not compulsory if the class package wins. [39,56]
39-44	Aegis of the Scarlet Commander, Cathedral (equip 39). Fresh plate with tank stats when affordable; avoid a full auction-house makeover. [38]	Hand of Righteousness and Whitemane's Chapeau, Cathedral (39). Glowing Eye of Mordresh from RFD is a healer comparison; source/late tuning provisional. [38,57]
45-49	Plan Maraudon quest for Thrash Blade. ZF weapon/shield drops are bonuses during the quest run; do not add a separate RNG farm for a small gap. [37]	Maraudon quest option Resurgence Rod. Compare actual healer stats against Tidebringer's setup. Keep healing consumables current instead of buying an expensive rare placeholder. [37]
48-54	Thrash Blade remains a notable quest target. Temple/BRD shield candidates are BASELINE until live tooltips and sources are checked. Preserve Ravager.	Gizlock's Hypertech Buckler is a Classic-derived Maraudon shield comparison. Temple healer gear and class rewards: inspect before selecting. [58]
55-59	Targeted BRD / LBRS / Stratholme for weak slots and key progression; get a survivable kit before chasing a paper threat set. [48]	Targeted BRD healing trinket candidates; Stratholme chest/neck candidates. Use page 27 as a provisional shortlist, not a shopping mandate. [49]

Library books: another route-friendly upgrade source [59]

Loot nearby books and hand them to **Owen Thadd, Magic Quarter, Undercity**. Current guides list reward milestones at 10, 20 and 25 books: necklace, ring, then additional equipment choices. Each character should track its own collections. Collect books near quests you are doing; do not spend an entire short evening crossing continents for a minor reward.

What to pass over

Unknown-source “BiS” items, expensive random-suffix perfection, and old item-page comments that discuss a different expansion. **Shamans cannot use swords**: a caster-looking Inventor's Focal Sword is not a Nikki weapon recommendation. Confirm any new Forever proficiency explicitly before treating an old restriction differently.

Time labels: quest reward already on route = high value; detour that also gives a class unlock/Legacy point = often high value; repeated boss drop = discretionary; rare world drop / auction purchase = price-dependent. Ravager is your explicit exception to the usual one-clear preference.

Sources: 23,24,37,38,39,48,49,56,57,58,59. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

Level 60: provisional first gearing targets

Forever's own class BiS guides warn that level-60 items and rankings are incomplete or obscured. Do not invest heavily solely on a datamined list. These are obtainable-route candidates to inspect after launch; the Classic source mapping is explicitly a fallback. [60,61]

Character / slots	Target to inspect	Source / status
Marc: one-hander	Thrash Blade	Maraudon quest. Forever quest reward verified; compare with new drops. [37]
Marc: shield	Draconian Deflector	General Drakkisath, UBRS. CLASSIC baseline. [48]
Marc: head / shoulders	Current-level plate with usable tank stats	Compare live dungeon rewards and crafts; check source and price before farming.
Marc: chest / legs / feet	Sturdy plate with stamina, threat stats and appropriate defense	Use current Forever rewards/crafts; do not trade away survivability to complete an old set.
Marc: trinket	Diamond Flask if unchanged; defensive alternatives	Level-50 class-chain reward/Temple, BASELINE. Choose tank use versus a DPS trinket goal. [31]
Nikki: head	Insightful Hood	Cho'Rush, Dire Maul North. CLASSIC baseline. [49]
Nikki: shoulders	Royal Cap Spaulders / Mantle of Lost Hope	Jandice, Scholomance / Lord Roccor, BRD. CLASSIC baseline. [49]
Nikki: cloak	Hide of the Wild	Leatherworking/BoE craft. CLASSIC baseline; compare current crafts. [49]
Nikki: chest / neck	Robes of the Exalted / Animated Chain Necklace	Baron Rivendare / Ramstein, undead Stratholme. CLASSIC baseline. [62]
Nikki: ring	Rosewine Circle	War Master Voone, LBRS. CLASSIC baseline. [63]
Nikki: trinket	Second Wind / Mindtap Talisman	Golem Lord Argelmach, BRD / Magister Kalendris, DM West. CLASSIC baseline. [63]
Nikki: weapon / shield / relic	Keep strong class rewards until measured upgrade	Compare actual Forever healing, mana and useful effects; existing gear remains the default if evidence is uncertain.

Suggested paired nights: BRD targeted run first; undead Stratholme when both are ready; LBRS for quests/attunement plus gear; Dire Maul after key/route planning. One dungeon that helps both beats two separate single-item trips.

A full all-slot, all-level Forever BiS prescription would currently imply more certainty than the sources support. This guide instead gives upgrade opportunities throughout the climb and identifies the late slots where the live game must decide the winner.

Sources: 31,37,48,49,60,61,62,63. Route choices, time budgets and duo ranges are Scribe's planning recommendations.

KEEP THE PLAN USEFUL AFTER THE FIRST EVENING

Duo farms and your next-session log

Level / setup	Trial location	Goal / stop rule
16-24, sword + shield	Dense, level-appropriate melee quest camps in Barrens / Silverpine	Start with 2-3 mobs. Expand only if Nikki stays comfortable and recovery is short.
25-36, sword + shield	Compact melee camps in Thousand Needles, Hillsbrad or STV	Prefer several relevant quests at once. Skip caster-heavy packs when they interrupt your rhythm.
37-44, Ravager available	Previously cleared outdoor melee camps; old RFC as a controlled test	Outdoor XP/loot first; old dungeon gear/material farming second. Avoid a long detour for gray-mob XP.
45-54, both loadouts	Selected old SM/RFK sections only after testing; current-level outdoor packs	Use dungeon farms for a defined item/material goal. Compare shield/Revenge clear time with Ravager.
55-60	Selected old dungeon routes or BRD early sections	Treat bosses/control mechanics individually. No blanket promise that full contemporary dungeons are efficient as a duo.

Thirty-second decision rule

If the next activity provides **two or more** of shared quest progress, a class unlock, a major gear target or Legacy credit, it deserves priority. If it provides one minor upgrade plus long travel, leave it optional. Ravager and Nikki's class weapon package get their own deliberate sessions.

Marc & Nikki's Horde journey: review and Ravager addendum

Quest for XP.
Dungeon for loot.
Cleave when rested.

What this is: the Revision 2 section of the combined guide. Pages R1-R10 override pages 1-28 where they conflict, and flagged pages carry a red note pointing here. Plain page numbers refer to the original guide.

The uncomfortable part first. Forever's beta cut dungeon *mob* XP by roughly three quarters and only gave back 20% of that. It also trimmed XP from green open-world mobs. Dungeon *quests* still pay about double their Classic XP. So the guide's "one prepared full-quest run per dungeon" rule is right. But Ravager cleave sessions in old dungeons will be slow XP, and a Protection Warrior using a two-hander switches off most of Forever's new Protection kit. "Operation Ravager v2" rebuilds the Ravager plan around that. [2,3,4,9]

The eight changes that matter most

#	Change	Original page	Evidence
1	**Respec Marc to Arms at 37 for Ravager; take dual spec at 40** (Arms open world, Protection for dungeons). Prot's new rage and damage talents need a shield.	1, 13, 14	FOREVER talents; JUDGMENT plan
2	**Grind with Ravager only when rested and Well Fed.** Rested XP and Well Fed both apply to kills only, so a cleave session doubles their value.	4, 28	FOREVER
3	**Pull yellow and orange mobs, never green.** Green mobs now give 4-20% less XP than in Classic, and Blizzard says that is intended.	13, 28	FOREVER
4	**Ravager slows Marc by 80% while it spins** (per Forever item data). Gather the pack before the proc; Nikki's Earthbind keeps it in range.	13	FOREVER data, TEST
5	**Legacy has a 16-point per-character spend cap at launch.** Well Rested 5 + Talented 5 leaves 6. Put them in Thrill of Adventure 5 (heal and mana on open-world killing blows) + Frequent Flier.	5, 6	FOREVER ; JUDGMENT spend
6	**Windfury is now a party totem buff**, not a Shaman weapon imbue. Earth Shock now also taunts and interrupts, so Nikki can peel mobs off herself.	15, 16	FOREVER
7	**Add Riverglades (Rog'mar, about 36-44) and look at Shen'dralas (about 40-50).** Both are new zones the route treats as optional or misses entirely.	2, 10	FOREVER, level bands disputed
8	**Budget 100g for riding at 40** (includes the mount) plus an unknown dual-spec fee. There is no group finder and there are no summoning stones, so walk-in travel is real time.	10, 3	FOREVER

Evidence tags: FOREVER = a Forever-specific source, almost all from beta (level capped at 30 for most of testing). CLASSIC = Classic-era knowledge with no Forever confirmation. TEST = check in the live client on Nov 4. JUDGMENT = my recommendation, not a sourced fact. Anything above level 30 is beta data at best; nobody has launch-tested it.

CORRECTIONS KEYED TO THE ORIGINAL

What to change, page by page

Page	Original says	Change to
4	Camp Tent raises rested XP to 5% of a level.	True. Also: the tent needs a campfire nearby, and it works as a **portable inn with safe logoff**. For 1-3 hour sessions, **log out at the tent where you quest** instead of hearthing. A basic fire holds 3 objects; a cook can upgrade it to 5 or 10. Camp buffs do not stack with the matching class buff. **FOREVER** [5,6]
4	Sleeping Bag chain: plan its travel in 15-24.	The chain is available at 14, but several guides say the **Horde version is harder than the Alliance one and suggest level 30+** for the later legs. Start it at 14 and finish the Arathi/Thoradin's Wall leg on a 30+ Eastern Kingdoms trip. The chain also reportedly gives two 12-slot bags. The "2-hour duration" is unsourced. **FOREVER**, **TEST** [7,8]
4	Well Fed: +5% XP from kills.	Confirmed. You must eat for 10 seconds; the buff lasts about 15 minutes. The Legacy perk **Gourmand** extends food buffs by up to 100%. **FOREVER** [9,10]
5-6	Ten points: Well Rested 5, then Talented 5.	Keep. Talented needs 5 points already in the Adventure tree, so the order is forced anyway. Additions: per-character spend cap is **16** at launch; there are 65 challenges in total (class 25/45/**60**, crafting 150/225/**300**, three Spelunker tiers, PvP, raids, map exploration). Legacy unlocks at character 25, at 150 in a crafting profession, or on full map exploration. **FOREVER** [10,11,12]
6	"After Talented, consider Frequent Flier."	Correct: it is a 1-rank tier-3 perk (flights 50% cheaper, 20% faster) that needs 10 points in Adventure. See the Legacy spend plan in this addendum for the remaining points. **FOREVER** [12]
8	Marc at 20: Ruga, then gather Brutal Hauberk materials.	Ruga's chain (Speak with Ruga, then Trial at the Field of Giants) ends at **Ruga's Bulwark**. The Hauberk is a separate level-30 chain: Speak with Thun'grim, then Brutal Armor, then Brutal Hauberk. Don't collect materials at 20. **CLASSIC** [13]
9	Marc at 30: Whirlwind two-hander optional.	The reward is now a **choice of Whirlwind Axe, Sword or Warhammer**, and Cyclonian is still a level 40 elite. Skip it pre-Ravager unless a group is already there. **FOREVER** [14]
13	"Remain Protection" with Ravager.	Replace with section 7. Prot's Shield Specialization rage, Master of Defense, Bastion, Shield Block and Shield Slam all need a shield. Arms has Sweeping Strikes and the new Weaponmaster talent, which scales with any two-hander. **FOREVER** [15,16,17]
14	Training calendar.	Add: **Victory Rush at 20** (heals 10% of max health, 30-sec cooldown). **Thunder Clap works in Defensive Stance** (4 targets, 6-sec cooldown), and is now Prot's main AoE threat tool. Tactical Mastery is baseline at 14. Shield Wall and Retaliation are 15-minute cooldowns, so use them on big pulls. **FOREVER** [15,18]
15-16	Windfury Totem is separate from the Windfury Weapon imbue.	Reported change: **Windfury and Flametongue are party totem buffs, not weapon imbues**. Totems have a 1-sec global cooldown and buff totems last 5 minutes. Tranquil Air is removed. Totemic Recall refunds 25% of totem mana. Earth Shock taunts and interrupts. The order of Call of the Spirits (30) and Call of the Ancestors (40) is disputed between client data and the deep dive. **FOREVER**, **TEST** [19,20,21]
11, 24	Level 50 Elemental Mastery chain to Da Voodoo.	The Elemental Mastery talent was reportedly removed from the tree; the quest chain itself has no Forever source. Treat it as unverified, not as a planned reward. **CLASSIC**, **TEST** [22]

17-18	"Duo trial" windows for old dungeons.	Drop them as XP plans. With mob XP down roughly 70% from Classic, a duo clearing an old dungeon is a loot or gold run, not a leveling run. Keep the "Early group" and "Quest-ready floor" columns. **FOREVER** [2,3,4]
17, 22	SM: Graveyard 28-30, Library 31-33, Armory 35-37, Cathedral 37-39.	Forever bands: Graveyard 30-38, Library 33-41, Armory 36-44, Cathedral 38-46. Herod is listed as a level 40 elite. The guide's windows are the low edge; fine with three DPS, tight below that. **FOREVER** [23]

SYSTEMS THE ORIGINAL UNDER-WEIGHTS

How XP actually works in Forever

Rule	What it means	What you do
Dungeon mob XP	Cut about 75-80% in beta, then raised 20% on Oct 8, for a net of roughly 70% below Classic. Blizzard says dungeon spam should not beat questing. FOREVER [2,3]	One prepared full-quest run per dungeon, as the guide already says. Repeat runs only for a named item.
Dungeon quest XP	Halved on Oct 1 but still about double Classic. Example: Deviate Hides went from 1,600 XP in Classic to about 3,100. FOREVER [4]	The guide's prep pages (19-24) are its most valuable part. Keep them.
Green mobs	Low-level open-world mobs give 4-20% less XP than in Classic; Blizzard says this is staying. FOREVER [9]	Leave a zone once its mobs turn green. For Ravager, pick camps at or above your level.
Rested XP	Pool caps at 150% of a level and doubles **kill** XP only. It builds in inns, capitals, or when you log out at a Camp Tent. FOREVER [24]	Save a full rested bar for a Ravager evening. Quest turn-ins don't spend it.
Party XP	Kill XP is split with a small party bonus. A bug that awarded XP from the highest-level member is fixed; XP now uses each player's own level against the mob. Larger level gaps are penalised. FOREVER [3,25]	Keep Marc and Nikki within a level of each other, as page 2 already says.
Quest drops in a group	Reportedly distributed round-robin inside a party. Quest XP is not split; each player gets the full reward. FOREVER [25,26]	Collection quests finish closer together. Each player still needs their own count.
Not in Forever	No sources found for Darkmoon XP buffs, Recruit-a-Friend XP, heirlooms, XP potions or guild perks. Sayge gives 2-hour stat buffs only. JUDGMENT from absence of sources	Don't plan around them.

Launch-day logistics (missing from page 3)

- **No realm list.** You choose a ruleset (Normal, PvP, RP, RP-PvP), and each ruleset is one world split by layering. **Both of you must pick the same ruleset**; transfers between rulesets are not offered. FOREVER [27]
- **Opens Nov 4, 3:00 pm Pacific** (23:00 UTC). Expect crowded starting zones on day one. Each of you levelling apart to 10, as page 3 suggests, avoids fighting for tags as a pair. FOREVER [1,27]
- **No group finder and no summoning stones.** The LFG board exists, but someone walks to every entrance. Ask recruits to meet at the door. FOREVER [28]
- **Troll racial Rapid Regeneration:** a 6-second channel that heals 50% of health, broken by damage or movement. It is free downtime for Marc between pulls and saves Nikki mana. Bow and Throwing specializations are gone. FOREVER [29,30]

Thirty-second rule, updated: a dungeon visit earns its slot through quests, a class unlock, Legacy credit, or a named item. Mob XP no longer counts as a reason. Open-world kill sessions earn their slot only with a rested bar and food active.

LEGACY, ROUTE AND CLASS ADDENDA

Spend plan, new zones, new tools

Legacy: points 11-16 on each character

Character	Points 11-16 (after Well Rested 5 + Talented 5)	Why
Marc (Warrior)	**Thrill of Adventure 5** (restores 1-5% health and mana over 10 sec after a killing blow, open world only) + **Frequent Flier 1**.	Ravager pulls give many killing blows. That means less downtime between packs and less healing for Nikki. JUDGMENT
Nikki (Shaman)	**Frequent Flier 1**, then **Gourmand 3** (food buffs up to +100% duration) or **Field Guide 3** (camp cooldown -8/17/25%).	Nikki lands few killing blows, so Thrill is weaker for her. Longer Well Fed or more camp uptime helps you both. JUDGMENT

Perk names and values differ slightly between sources; read the live tooltip before spending. Only 16 points can be spent per character at launch, and Nikki earns hers on her own Battle.net account. FOREVER [10,11,12]

Route additions (pages 2, 10)

Zone	Levels	Use
Riverglades (Horde hub Rog'mar)	About 36-44	New zone with flight paths to Stonard, Kargath and Hammerfall, which suits the Eastern Kingdoms trip rule. Move it from "40-44 option" to a main 37-42 choice next to STV, and pair it with Krol'dok Stronghold (40-45). It can replace parts of Badlands/Dustwallow. FOREVER [31,32]
Shen'dralas	About 40-50, disputed	New contested zone south-east of Desolace, between Feralas and Mulgore. Look at it in the 42-48 window alongside Feralas, but don't commit to it before launch reports. FOREVER, TEST [33,34]
Desolace	About 32-40	Reworked: new centaur faction quests and a path to Shen'dralas. Better than its Classic reputation. FOREVER [35]

Marc: Forever kit to use

- **Prot rage engine:** Shield Specialization gives rage on block, and the new Master of Defense gives 5 rage on dodge or parry (shield required). Armor and absorbs no longer reduce rage gained from damage. FOREVER [15,16]
- **Prot leveling talents:** Shield Specialization, Improved Thunder Clap and Improved Bloodrage first. Then Concussion Blow (30), Focused Rage 3/3, Bastion 5/5, and Vanguard (Charge in Defensive Stance). FOREVER [17,36]
- **Shield Slam** is still the Prot capstone (about 39-40 without Talented). It scales with Block Value and has a 50% chance to dispel a magic effect. FOREVER [37]
- **Rage from auto-attacks** now scales with weapon speed, so Ravager's slow 3.50 speed is not a rage penalty. FOREVER [16]

Nikki: Forever kit to use

- **Windfury Totem** becomes Marc's biggest damage buff, and with Ravager every extra swing is another proc roll. Grace of Air may not stack with it. FOREVER; proc interaction TEST [19]
- **Earth Shock taunt:** peel a mob off yourself, then Marc taunts it back. FOREVER [20]
- **Water Shield** (Resto talent): 3 globes, each restoring 2% of max mana when hit or on a spell crit. **Riptide** at 40: instant heal plus heal-over-time, 6-sec cooldown, and +25% Chain Heal on that target. FOREVER [38]
- **Mana Tide** moved earlier (about 25) and now has a 30-yard range. FOREVER, row disputed

Operation Ravager v2: get it, then spec for it

Item facts (Forever data, never live-tested): Ravager, two-handed axe, **requires level 37**, item level 42, 104-157 damage, 3.50 speed. Proc: attack all nearby enemies for weapon damage +5 **every 3 sec for 9 sec** (3 ticks) **and reduce your own movement speed by 80%**. Beta drop-rate estimates range from 10.9% to 25%; Classic was about 15%. It did not exist in the beta client, which was capped at 30. FOREVER data, TEST [39,40,41]

Farming Herod without wasting the evening

Step	Action
Lockouts	Assume the Classic limit of **5 instances per hour** (30 per day) per account until launch says otherwise. If each run is roughly 12 minutes, five runs fill the hour, so the cap is real. The party leader resets the instance after everyone has left. CLASSIC, TEST
Fastest path	With the Scarlet Key (Library chest after Doan), you run Armory straight to Herod. Clear only the trash on the route. Armory trash XP is nerfed, so don't full-clear for XP. FOREVER [23]
Odds	At 15% per kill, the chance of at least one drop is 56% after 5 runs and 80% after 10. At 25%, it is 76% after 5. **Book two evenings, not one.** JUDGMENT
Group	A three-DPS group that wants Herod's other loot (Scarlet Leggings now require 39; Raging Berserker's Helm has crit rating) will stay longer. Agree before the first pull that Ravager goes to Marc. FOREVER [40]

Spec plan

Level	Marc	Why
30-36	Protection, sword and board. Bank Ravager if it drops early. Keep two-handed axe skill trained.	Ravager can't be equipped yet; Prot is the dungeon spec. JUDGMENT
37-39	**Respec Arms** for open-world Ravager: Sweeping Strikes, Weaponmaster, Tactical Mastery. Keep tanking dungeons in Arms with a shield (Defensive Stance, Thunder Clap, Shield Block baseline) at this level, or delay the respec until after your Cathedral/RFD runs.	Method recommends Arms/two-hander for duo leveling with a healer, and Kargoz suggests temporarily going Arms with Ravager. FOREVER [17,42]
40	**Buy dual spec:** Arms (Ravager, open world) and Protection (dungeons, groups). Train riding the same visit if gold allows; dual spec gold cost is unknown.	Dual spec unlocks at 40 from the class trainer. FOREVER [43]
45-60	Keep Ravager in the Arms set while yellow-mob camps still die well. Replace it when a level 50+ two-hander from quests (Thrash Blade is one-handed, for the Prot set) clearly outdamages it.	Ravager is item level 42; it falls behind around the mid-50s. JUDGMENT

If Marc would rather stay Protection: keep the original plan, but use Ravager only for packs of five or more, and swap back to the shield the moment Nikki calls "mana stop". The Prot cost is real: no Shield Block, no Shield Slam, no shield-based rage, and fewer Revenge procs.

NEW SECTION REQUESTED: AOE CLEAVE GRINDING

The cleave playbook for a Warrior and a Shaman

Realistic expectation: no one has measured Forever XP per hour for any of this, and the beta stopped at 30. Blizzard's AoE nerfs hit Mages and Paladins (Blizzard slow, Cone of Cold, Consecration), not Warriors, and no pull-size XP penalty was found. Classic Ravager proc rates were about 1 in 20-40 swings, so the spin is a bonus, not a rotation. **The best use is cleaving quest kill objectives, not replacing quests.** FOREVER nerf notes; CLASSIC proc rate [44,45]

When a pure grind session is worth it

- **Both rested bars are full** (log out at the tent or an inn the night before), and **Well Fed is active** on both. Those two bonuses only apply to kills.
- The camp is **yellow or orange** to both of you, respawns quickly, and at least one active quest needs those kills or drops.
- Stop when rested runs out, or when one pull in three ends with Nikki drinking. That is the point where questing wins again. JUDGMENT

Pull routine (open world)

Phase	Marc	Nikki
Set up	Battle Shout. Arms: Battle Stance; Prot: Defensive Stance.	Drop Strength of Earth, Windfury and Mana Spring at the kill spot **before** the pull, then stand at max heal range behind the totems.
Gather	Pull 3-4 mobs first, then 5-6 once comfortable. Body-pull or tag each and run to the totems. Gather *before* a proc, because the 80% slow means Marc can't chase runners.	**Earthbind Totem** at the pile keeps mobs inside the spin. Frost Shock any runner at low health.
Burst	Demoralizing Shout, Thunder Clap (4 targets), Sweeping Strikes, then Cleave or Whirlwind. **Don't press abilities during a spin** until you've tested whether they cancel it.	Healing Wave as the steady heal; Lesser Healing Wave for spikes. Chain Heal from 40 when you are both taking damage.
Emergency	Retaliation (Battle Stance) or Shield Wall (Prot), both on 15-min cooldowns. Victory Rush on cooldown. Berserking for a fast finish.	Earth Shock to taunt a mob off yourself. Mana Tide when below half mana. Stoneclaw Totem to pull hits off you.
Recover	Rapid Regeneration between packs (Troll). Thrill of Adventure if taken.	Drink only at below 40% mana; otherwise keep moving to the next pack.

Day-one tests before trusting any of this TEST

- Does Thunder Clap, a stance change or a shout cancel the spin? (Classic players reported that stance changes and casts did.)
- Do Windfury extra attacks roll the Ravager proc? Is the spin capped at a target count like Thunder Clap and Whirlwind (4)?
- Record kills, time and XP for 15 minutes on one camp, then compare with 15 minutes of nearby questing. Keep whichever is higher.

OPEN-WORLD CAMPS FROM 37 TO 60 (HORDE-REACHABLE)

Where to cleave

Mob levels and camp layouts are Classic data unless tagged otherwise. Forever reworked some zones, so check the first visit. Ranked within each band by expected fit for Ravager: dense, melee, few casters, at or above your level, and near Horde quests.

Level	Camp	Why it works	Risks
37-40	**STV: Venture Co.** (Lake Nazferiti, Venture Co. Base Camp near Grom'gol)	Dense goblin humanoids close to Grom'gol; overlaps Booty Bay and Grom'gol kill quests. CLASSIC	Geologist casters. STV is a world-PvP zone on PvP rulesets.
37-40	**Arathi: Boulderfist ogres** (Boulderfist Hall area)	Melee ogre packs; Hammerfall is close. CLASSIC	Boulderfist Magi. Avoid Witherbark trolls (witch-doctor hexes).
37-42	**Riverglades camps** near Rog'mar	New zone at the right level with the Krol'dok dungeon nearby. FOREVER zone	No camp data yet. Scout on your first quest pass.
40-45	**Tanaris: Wastewander bandits** (Noonshade Ruins, Waterspring Field)	Fast respawns, packed camps, and Gadgetzan's Wastewander Justice and Water Pouch Bounty quests. Listed on Forever 40-50 routes. CLASSIC camps	Shadow Mages; rogues stealthed nearby.
40-45	**STV: Bloodsail pirates** (southern coast)	Dense melee pirates near Booty Bay; you'll pass them anyway. CLASSIC	Mage casters; contested coastline.
44-48	**Tanaris: Lost Rigger Cove** (Southsea pirates)	Tight melee packs on a small cove; matches the Steamwheedle pirate quests. CLASSIC	Cannoneers and named pirates hit hard. Pull from the edge inward.
44-50	**Searing Gorge: Dark Iron dwarves** (Grimesilt Dig Site)	Mostly melee dwarf packs; also on Forever 43-50 routes. CLASSIC	Geologist casters; elites in the Slag Pit, so stay outside it.
48-54	**Felwood: Deadwood furbolgs** (north Felwood)	Tight camps; the kills also earn Timbermaw reputation for Winterspring. CLASSIC	Shaman furbolg healers and totems; some flee at low health (Earthbind helps).
50-54	**Un'Goro: gorillas** (Un'Goro Ridge, north-west)	Beast packs with no casters; the best Classic Ravager fit in this band. CLASSIC	Stompers knock down and stun; elite Devilsaurs patrol. The new Shaper's Terrace dungeon is in the northern hills, so the terrain may have changed. FOREVER
53-58	**Winterspring: Winterfall furbolgs**	Dense camps; continues the Timbermaw reputation from Felwood. CLASSIC	Shamans and totems; long flight from Kalimdor hubs.
54-59	**Eastern Plaguelands: Plaguewood, Terrordale** (ghouls, Plaguehounds)	Melee undead that never flee; Nathanos's Demon Dogs and Carrion Grubbage kill quests overlap. CLASSIC	Banshees silence and curse; Nikki should cleanse.
55-58	**Western Plaguelands: Andorhal skeletons**	Dense skeleton packs for the Bulwark's Skeletal Fragments quest. CLASSIC	Skeletal Sorcerers and Acolytes cast. Rank it below Plaguewood.
50-58	Burning Steppes: Blackrock orcs	Dense, but low priority. CLASSIC	Warlocks with pets that fear; Firegut ogre mages.

Skip for Ravager: Feralas Gordunni and Grimtotem camps (too many casters); Desolace centaurs below 38 (mostly green at Ravager's level, plus runners and Stormseers). CLASSIC [45,46]

DUNGEONS: WHEN CLEAVING IS STILL THE RIGHT CALL

Dungeon cleave: loot, gold and fun, not XP

Dungeon / spot	When	Verdict
SM Armory (Herod runs)	37+	The one dungeon farm this plan approves: a named item. Clear only route trash. FOREVER band 36-44
SM Graveyard / Cathedral trash pulls	40-46 Cathedral	Classic's famous warrior pulls. At Cathedral level they're good gear-and-quest runs with a group; as a duo, do them only for Cathedral loot (Aegis of the Scarlet Commander, Whitemane's Chapeau). CLASSIC, nerfed XP
Krol'dok Stronghold (Riverglades)	40-45	New outdoor ogre dungeon that one guide calls "the designed replacement for grinding SM". It's the most promising new cleave target, but there is no trash data yet. FOREVER, TEST [47]
ZF graveyard (non-elite zombies before the stairs)	48+	Classic AoE spot; a test after the ZF quest run, not a plan. CLASSIC
Maraudon, Stratholme	60	Gold and material farms at 60 once both of you are geared. Not leveling content. CLASSIC
Ruins of Lordaeron	15-20	The best Prot pull loop reported in beta (10-15 mob pulls), but it's far below Ravager's level. Mentioned only to confirm that Forever's Prot handles large pulls. FOREVER [44]

Where Ravager fits in the original route

Level	Recommendation
37-40	Herod farm (two evenings budgeted), then Arms respec. Cleave STV/Arathi kill quests between SM runs.
40-44	Dual spec + riding. Riverglades questing and Krol'dok; Tanaris bandits once Gadgetzan opens.
44-50	Lost Rigger Cove and Searing Gorge on rested evenings; ZF/Maraudon runs in Prot.
50-55	Un'Goro gorillas and Felwood furbolgs while questing at Marshal's Refuge and Bloodvenom Post.
55-60	Plaguewood ghouls on rested nights; BRD/LBRS in Prot. Retire Ravager when a level 50+ two-hander clearly beats it.

Session-log addition (page 28): add a "Rested before / after" line and a "Ravager procs counted" line to the Duo test row. After three grind evenings you'll have your own XP-per-hour figure, which beats every number in this addendum.

Verification and coverage notes

Verified from retrieved sources: launch date; Battle.net Legacy scope/cap; reported crafting thresholds; Talented mechanics; tent cap and food/sleeping-bag distinctions; early quest bundles; Ravager required level; Shaman class-weapon opportunity. The crafting-only ten-point plan is a derived combination of milestones.

Not independently tested in game: proposed duo windows, clear-time budgets, the absolute earliest global Legacy strategy, complete new late-dungeon quest bundles, final level-60 loot/rankings and all late ability ranks. The guide states those limits where they affect a decision.

Resolve source conflicts in the live client before travel: RFC satchel starter; WC Leaders prerequisite/minimum; Dalaran quest count; profession binding requirements; later dungeon keys/rewards. Do not copy comments from another expansion as Forever mechanics.
